

Entwickler und Architekten

Strategien 2019

Oliver Sturm • @olivers • oliver@oliversturm.com

Oliver Sturm

- Training Director at DevExpress
- Consultant, trainer, author, software architect and developer for over 25 years
- Contact: oliver@oliversturm.com

Agenda

Idee: Technologie diskutieren

Was sind Ihre Fragen? Diskussionspunkte?

Anregungen

- Microservices, ja oder nein? Und wie?
- Cloud - muss das sein? Welche? Worauf kommt's an?
- Serverless - wird da nicht alles schwieriger?
- Container und VMs - Docker, Kubernetes, Vagrant, Terraform...
- Blazor? Xamarin? Womit konkurrieren diese Plattformen?
- Wie mache ich am besten Mobile?
- CQRS? Event Sourcing? Eventual Consistency? Moderne

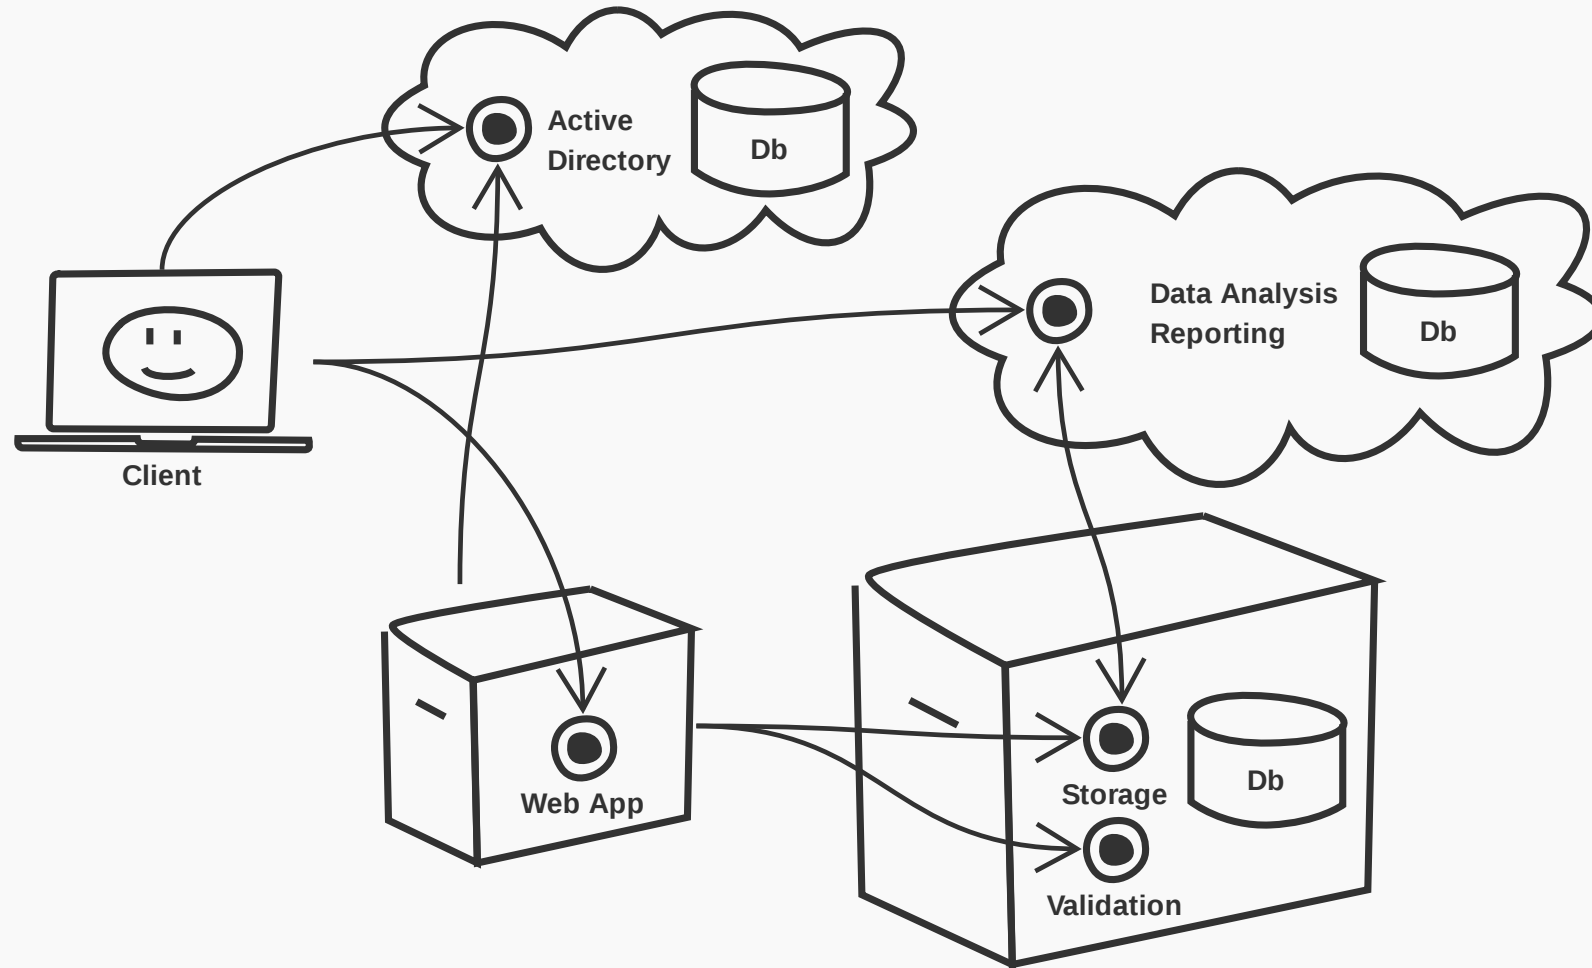

Datenzugriffspatterns

- React vs Vue vs Angular usw....
- TypeScript oder doch einfach JavaScript?
- Oliver Sturm's Best Practices Architekturmodell

Fragen

- Microservices
- Serverless
- CQRS, Event Sourcing...
- Blazor und Xamarin
- Container, Docker etc
- Altlasten modernisieren
- Anpassbare Standardsoftware entwickeln (Workflow-Komponenten)
- Vue vs React vs Angular
- Was kann man gegen Excel tun?
- JavaScript vs TypeScript

Dienststruktur

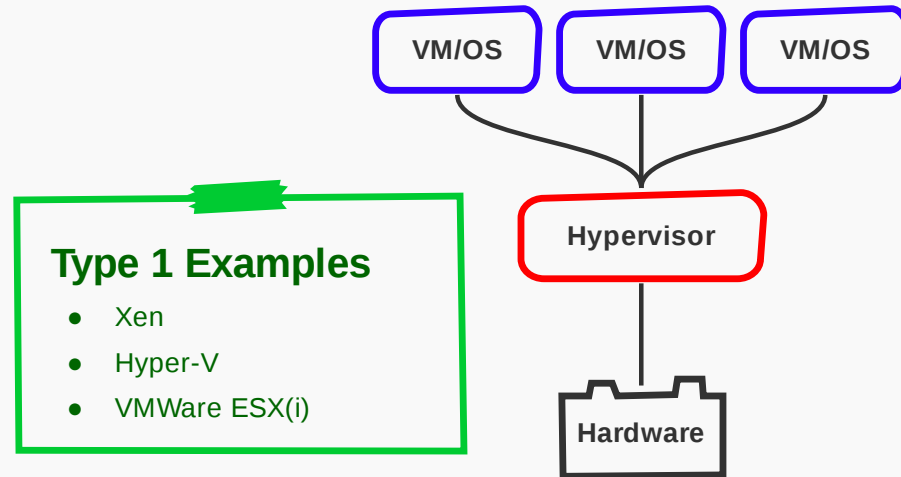

CQRS und Event Sourcing

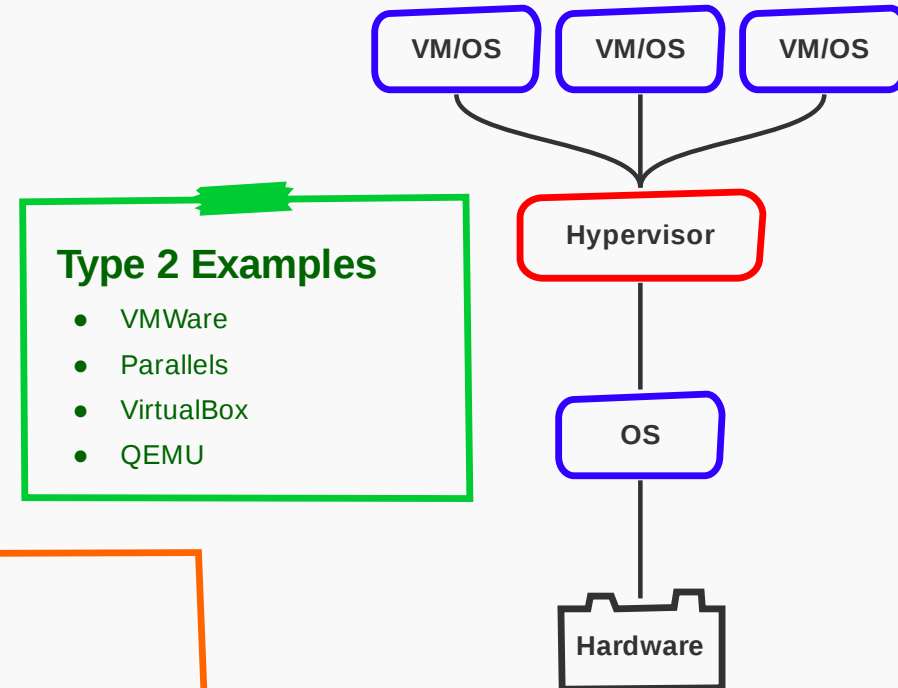

Hypervisors

Type 1 Native Hypervisor

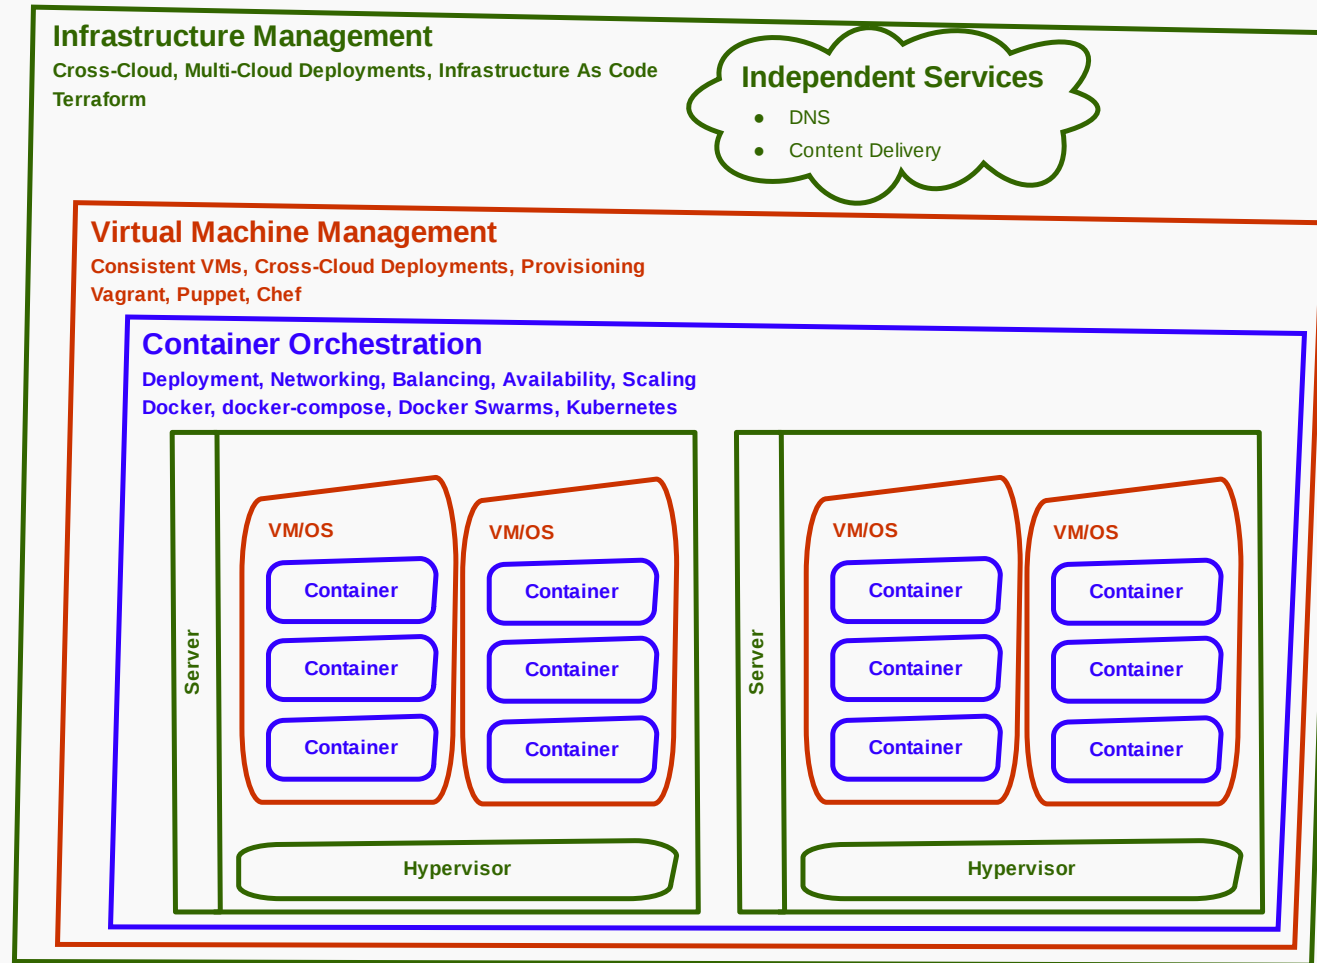

Type 2 Hosted Hypervisor

A bit complicated

- KVM - can be type 1 or 2
- Hyper-V really is type 1

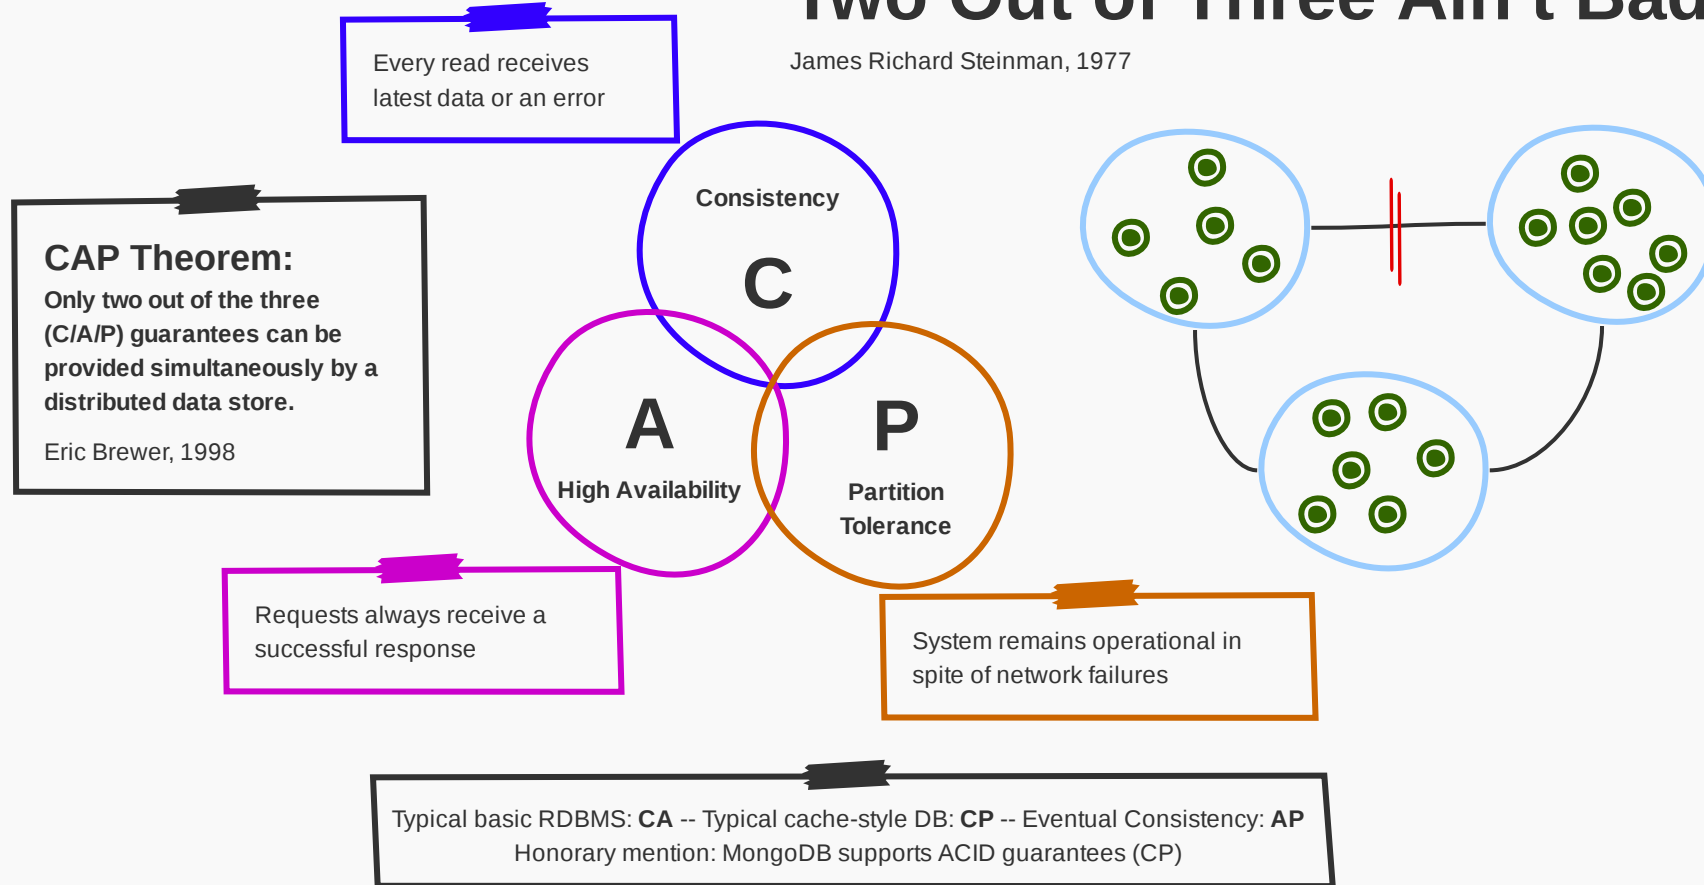

Container und VMs

CAP Theorem

Two Out of Three Ain't Bad

James Richard Steinman, 1977

JavaScript vs TypeScript

Languages by bug density - GitHub repos with >100 stars

In green, in the "advanced" static typed languages corner: Haskell, Scala and F#.

In orange, in the "old and boring" static typed languages corner: Java, C++ and Go.

In red, in the dynamic typed language corner: JavaScript, Ruby, Python, Clojure and Erlang.

Daniel Lebrero, May 2016, [The broken promise of static typing](#)

My own prediction is that TDD is the deciding factor. You don't need static type checking if you have 100% unit test coverage. [...]

I predict, that as TDD becomes ever more accepted as a necessary professional discipline, dynamic languages will become the preferred languages.

Uncle Bob Martin, May 2016, [Type Wars](#)

When it comes to bug reduction, I think it's fair to say:

Static types are overrated.

Eric Elliott, June 2016, [The Shocking Secret About Static Types](#)

I will not use the current version of TypeScript in my next large scale application, because the larger the project is, the more the costs of using TypeScript compound.

Eric Elliott, January 2019, [The TypeScript Tax](#)
